TABLES

1. Estimated Number of Basic Administrative Units—Public Elementary and Secondary Schools, 1985-86 (Revised) and 1986-87 31
2. Estimated Fall Enrollment in Public Elementary and Secondary Day Schools, 1985-86 (Revised) and 1986-87 32
3. Estimated ADM and ADA in Public Elementary and Secondary Day Schools and Number of Public High School Graduates, 1985-86 (Revised) 33
4. Estimated ADM and ADA in Public Elementary and Secondary Day Schools and Number of Public High School Graduates, 1986-87 34
5. Estimated Number of Instructional Staff Members in Public Elementary and Secondary Day Schools, by Type of Position, 1985-86 (Revised) 35
6. Estimated Number of Instructional Staff Members in Public Elementary and Secondary Day Schools, by Type of Position, 1986-87 36
7. Estimated Average Annual Salaries of Total Instructional Staff and of Classroom Teachers, 1985-86 (Revised) and 1986-87 37
8. Estimated Revenue and Nonrevenue Receipts, 1985-86 (Revised) 38
9. Estimated Revenue and Nonrevenue Receipts, 1986-87 39
10. Estimated Expenditures for Public Schools, 1985-86 (Revised) 40
11. Estimated Expenditures for Public Schools, 1986-87 41

Glossary 42

FOREWORD

Public education resources, processes, and outcomes continue to captivate nearly every segment of American society—educators, business leaders, parents, policymakers, and the media. State legislatures have become centers of debate over changes in teacher training, compensation, and evaluation, while the diminishing role of the national government in supporting public schools, financially and otherwise, has fueled the controversy over how states and localities will pay for education reform.

A major challenge facing educators is the appraisal of legislated changes spurred by the reform movement and implemented through local public school systems. The data presented in this report provide some insights as to whether state and local actions have made a difference, at least with regard to selected measures.

Estimates of School Statistics 1986-87, in its 45th year, provides current information about public school participation, employment, compensation, and finances, as reported by state education departments. The state-level data featured in *Estimates* permit broad assessments of trends in staff salaries, sources of school funding, and levels of education expenditures. While these data serve important measurement purposes, they should be used with the knowledge that data for individual school districts may vary widely from the state averages presented in this report.

This publication reflects the cooperative efforts of numerous individuals within the state departments of education, the NEA, and its state affiliates. NEA Research extends its appreciation to all those who contributed to this project.

April 1987

TECHNICAL NOTES

Estimates of School Statistics presents public school data for the fifty states and the District of Columbia, based on survey responses of state education agencies. State department of education contacts are asked to provide estimated data for the current year (1986-87) and revisions to four years of historical data, as necessary. Therefore, data for school years 1982-83 through 1985-86 were subject to revision as a result of the 1986-87 survey.

Estimated data in this report are featured for the current school year (1986-87) and for the prior year (1985-86) by state, with summary statistics for the United States over the last decade. These figures represent projections by state education agencies as of December 1986.

In the fall of each year, NEA Research submits current-year estimates of over 35 educational statistics to each state's department of education for verification and/or revision. The figures submitted by NEA Research result from regression analysis, a statistical technique designed to predict data using specified criteria. Only if an education department does not replace these predictions with their own estimated data do the original regression-generated figures appear in this report. Please note these exceptions on page 28.

Also, several state education agencies have provided additional information about the education data submitted for this report. Please note them on page 30.

NEA Research also provides state education agencies an opportunity to revise their fall estimates for inclusion in *Rankings of the States*, an NEA Research report published in the summer. As a result, estimated data contained in these two publications may differ.

Please note that this edition of *Estimates* uses a different version of the Consumer Price Index (CPI) to compute constant or "inflation-free" dollars. Previous editions featured a CPI using calendar year 1967 as its base. School-year 1976-77 is used as the base year in this report, for the computation of constant-dollar salaries, revenues, and expenditures.

Finally, data presented in *Estimates of School Statistics* and *Rankings of the States* are collected independently and separately from those collected by government agencies, such as the Center for Education Statistics within the U.S. Department of Education. Due to definitional differences as well as those in scheduling and frequency of revision, education statistics published by NEA Research in *Estimates* and *Rankings* and those published by the Center for Education Statistics often differ.

Significant Developments in Public School Statistics

- Public school enrollment is expected to increase by approximately 270,000 pupils from 1985-86 to 1986-87. Increases in the elementary grades are estimated at 400,000, while secondary classes are expected to enroll about 129,000 fewer students. In fact, levels of public school enrollment anticipated during the 1986-87 school year represents only the second time that total enrollment will register an increase since 1973. Of course, changes in enrollment are hardly uniform in local districts across the country, with considerable differences predicted from state to state and district to district.

- To meet the enrollment demands of local school districts, state education departments expect the number of public school classroom teachers to increase by over 23,000 from 1985-86 to 1986-87, with elementary-grade teachers representing nearly all of this increased demand. Implications for local school district finances are as varied as the demand for additional classroom teachers. But clearly they may present serious challenges to existing school finance relationships at the state and local levels as districts prepare to meet needs generated by increased enrollment and additional school personnel

- State education agencies expect the average classroom teacher salary to increase by 5.9 percent over 1985-86—from $25,206 to $26,704. The national average salary, while useful as a benchmark statistic, hides vast differences among states, with statewide averages likewise clouding significant local variations.

- State governments continue to provide the largest share of public school financial support—50.0 percent estimated for 1986-87, up from the revised figure of 49.8 percent in 1985-86. Once again, differences among states are considerable, reflecting differences in state-local revenue systems, demographic characteristics, and program priorities, to name but a few factors.

- For the third year, local financial support of public schools has remained at about 43 percent. This represents a decline from 1982-84 when the local share stood near 45 percent.

- For 1986-87, the federal government's contribution to public elementary and secondary school revenues continues to diminish—down from a revised 6.5 percent in 1985-86 to an estimated 6.2 percent in 1986-87. Congressional actions to reduce the national deficit will likely exert a continuing downward pressure on the federal government's share of public school finances, and therefore increase pressure on state and local governments to meet the expanding financial needs of public education.

HIGHLIGHTS--1985-86 AND 1986-87 ESTIMATES FOR 50 STATES AND D.C.

GENERAL ADMINISTRATION

Each state has a state department of education (headed by a chief state school officer) that exercises general control over public elementary and secondary schools. Many states, particularly those with large numbers of small school districts, have intermediate administrative units operating between the state and the local levels. These intermediate units render consultative, advisory, and statistical services, and perform regulatory and inspectional functions. Some operate specialized schools for vocational education, special education, and so on. The local school district is the basic administrative unit for the operation of elementary and secondary schools or for contracting for school services. The governing body of the district is the school board, and the chief administrative officer is the superintendent of schools.

Basic Administrative Units

Marked diversity is found in the way public schools are organized across the country due to the variety of state legislative provisions for their administration and operation. A school district may itself operate a school system for all or for some of its children (operating school district), or it may pay other districts for these services (nonoperating school district), and may range from one-school rural districts to large metropolitan systems serving many thousands of pupils.

The number of basic administrative units has steadily declined from 127,531 in 1931-32 to an estimated 15,681 in 1986-87. This trend primarily reflects school district consolidation and reorganization to achieve greater efficiency in delivery of public school services. Pressure to reorganize school districts will likely intensify as many states, particularly those characterized as "rural states," are faced with economic decline and the resulting reductions in state-local funds. States leading the nation with respect to the number of school districts are California and Texas, each reporting over 1,000 districts for 1986-87.

The decline in the number of basic administrative units is shown in the following table:

School year	Basic administrative units
1976-77	16,284
1977-78	16,200
1978-79	16,090
1979-80	16,044
1980-81	16,001
1981-82	15,959
1982-83	15,909
1983-84	15,857
1984-85	15,812
1985-86	15,739
1986-87	15,681

Of the 15,681 basic administrative units estimated for 1986-87, 15,427 (98.4 percent) are operating school districts, 254 do not operate their own school facilities but transfer pupils to other districts on a tuition basis. (See Table 1.) The comparison below by region for fall 1986 demonstrates the variation in the organization of school districts and the distribution of enrollment by region. For example, the New England region features 8 percent of the nation's operating districts and educates 5 percent of the nation's students. By contrast, the Plains states contain 7 percent of total enrollment but educates them in 20 percent of the nation's districts. The following chart can be compared with previous editions of *Estimates of School Statistics*, to identify shifts in the distribution of enrollment among regions in the U.S.

Region	Operating school districts		Estimated fall 1986 enrollment	
	Number	Percent of total	Number	Percent of total
New England	1,232	8.0	1,911,725	4.8
Mideast	1,859	12.1	6,214,903	15.6
Southeast	1,682	10.9	9,632,966	24.2
Great Lakes	2,912	18.9	6,999,496	17.6
Plains.....	3,080	19.9	2,918,006	7.3
Southwest.....	2,037	13.2	4,695,977	11.8
Rocky Mountains.....	925	6.0	1,439,845	3.7
Far West†	1,700	11.0	5,987,690	15.0
Total, 50 states and District of Columbia	15,427	100.0	39,800,608	100.0

†Includes Alaska and Hawaii.

PUPILS

Enrollments, average daily membership, and average daily attendance are basic measurements of pupil participation in public schools. Estimates of fall enrollments by state are shown in Table 2 for 1985-86 and 1986-87. The figures for the 50 states and the District of Columbia on average daily membership, average daily attendance, and the number of high school graduates are shown in Table 3 for 1985-86 and in Table 4 for 1986-87.

Fall Enrollment in Public Schools

Of all the variables featured in this report, enrollment is one being monitored more closely than most. Research literature and media accounts have been advising educators, policymakers, and the public that enrollment increases are on their way, and indeed, state education agency figures for 1985-86 signaled the end of an era of enrollment decline, and the beginning of an upward trend in public school enrollment for most states. Implications for the demand for public school teachers and other education personnel are obvious, and education expenditure decisions by state-local government will need to accomodate expanding resource demands associated with enrollment growth. This upturn in enrollment is reflected in the estimated data shown below for the U.S. as a whole:

Year	Total fall enrollment	Year	Total fall enrollment
1976-77.....	44,387,283	1982-83.....	39,679,523
1977-78.....	43,723,844	1983-84.....	39,407,874
1978-79.....	42,732,817	1984-85.....	39,353,897
1979-80.....	41,777,947	1985-86.....	39,529,922
1980-81.....	41,020,702	1986-87.....	39,800,608
1981-82.....	40,118,988		

Increases in enrollment at the elementary level account for the overall rise in pupil participation. The ten-year trend in elementary enrollment below highlights this development, showing increases in public school enrollment beginning in 1984-85:

Year	Elementary enrollment	Year	Elementary enrollment
1976-77.....	25,703,746	1982-83.....	23,883,056
1977-78.....	24,994,496	1983-84.....	23,672,032
1978-79.....	24,804,190	1984-85.....	23,686,296
1979-80.....	24,396,509	1985-86.....	23,960,172
1980-81.....	24,140,187	1986-87.....	24,360,173
1981-82.....	24,081,641		

Table 6 features state-by-state estimates of elementary enrollment for 1986-87, with 42 out of 51 states (including the District of Columbia) expecting increases in the number of elementary pupils over 1984-85. States projecting the largest increases, in percentage terms, are: Texas, Nevada, Delaware, Florida, Utah, Arizona, Alaska, Mississippi, New Mexico, and Washington.

Public school enrollment at the secondary level for the years 1976-77 through 1986-87 is featured below, confirming expectations that enrollment declines will characterize most states until the baby "boomlet" progresses through the elementary grades.

Year	Secondary enrollment	Year	Secondary enrollment
1976-77.....	18,683,537	1982-83.....	15,796,467
1977-78.....	18,729,348	1983-84.....	15,735,842
1978-79.....	17,928,627	1984-85.....	15,667,601
1979-80.....	17,381,438	1985-86.....	15,569,750
1980-81.....	16,880,515	1986-87.....	15,440,435
1981-82.....	16,037,347		

Average Daily Membership

In *State Education Records and Reports Series: Handbook II*, the U.S. Department of Education recommends average daily membership (ADM) as the best measure of pupil load and for computing per pupil expenditures. However, this unit of measurement is not uniformly used throughout the country.

Pupils are members of a school from the date they are placed on the current roll until they leave permanently. Membership is the total number of pupils belonging, the sum of those present and those absent. *Average daily membership for the school year is an average obtained by dividing the aggregate days of membership by the number of days in which schools were in session.*

For those states reporting an ADM count, estimated data for 1986-87 and revised estimates for 1985-86 are shown in Tables 3 and 4.

The 10-year trend in ADM shows a decrease of 10.8 percent since 1976-77. The estimated ADM since 1976-77 is shown below:

School year	Average daily membership	Percent change	
		Over 1976-77	Over previous year
1976-77	43,610,204	. . .	. . .
1977-78	42,938,327	- 1.5	-1.5
1978-79	41,934,900	- 3.8	-2.3
1979-80	40,811,970	- 6.4	-2.7
1980-81	40,182,110	- 7.9	-1.5
1981-82	39,305,879	- 9.9	-2.2
1982-83	38,883,177	-10.8	-1.1
1983-84	38,589,210	-11.5	-0.8
1984-85	38,751,006	-11.1	0.4
1985-86	38,705,754	-11.2	-0.1
1986-87	38,901,740	-10.8	0.5

Average Daily Attendance

The average daily attendance (ADA) for the school year is the aggregate days the pupils were actually present in school divided by the number of days school was actually in session. The figures below show the trend in ADA for the years 1976-77 through 1986-87:

School year	Average daily attendance	Percent change	
		Over 1976-77	Over previous year
1976-77	40,864,515	. . .	. . .
1977-78	40,160,598	- 1.7	-1.7
1978-79	39,206,446	- 4.1	-2.4
1979-80	38,411,337	- 6.0	-2.0
1980-81	37,857,375	- 7.4	-1.4
1981-82	37,071,838	- 9.3	-2.1
1982-83	36,752,334	-10.1	-0.9
1983-84	36,490,087	-10.7	-0.7
1984-85	36,504,840	-10.7	0.0
1985-86	36,642,002	-10.3	0.4
1986-87	36,837,858	- 9.9	0.5

Column 5 of Tables 3 and 4 shows that ADA was 94.7 percent of ADM in both 1985-86 and 1986-87. The difference between 100 percent and the percents shown in this column is an indication of average daily absence.

High School Graduates

The decline in the number of public high school graduates estimated for 1986-87 indicates the continuation of a trend which began in 1977-78. Reduced numbers of high school graduates reflect shifts within the school-age population, as increases take place in the earliest grades while smaller classes occupy secondary levels. An estimated 2,377,236 high school pupils will graduate in 1986-87, a 0.3 percent decrease over the revised estimate for graduates in 1985-86, and 17 percent lower than the number in 1976-77. The number of public high school graduates since 1976-77 are shown below:

School year	Number of high school graduates	Percent change	
		Over 1976-77	Over previous year
1976-77	2,862,152	. . .	. . .
1977-78	2,854,220	- 0.3	-0.3
1978-79	2,820,964	- 1.4	-1.2
1979-80	2,762,439	- 3.5	-2.1
1980-81	2,730,658	- 4.6	-1.2
1981-82	2,710,708	- 5.3	-0.7
1982-83	2,610,550	- 8.8	-3.7
1983-84	2,503,273	-12.5	-4.1
1984-85	2,423,586	-15.3	-3.2
1985-86	2,383,825	-16.7	-1.6
1986-87	2,377,236	-16.9	-0.3

INSTRUCTIONAL STAFF

The instructional staff is comprised of classroom teachers, principals, supervisors, librarians, guidance and psychological personnel, and related instructional workers. This category often is used to describe the total public school staff involved most directly with pupils and their education.

Total Instructional Staff

The total instructional staff in 1986-87 is estimated at 2,540,114. This is an increase of 25,358 or 1.0 percent over the revised estimate of 2,514,756 staff members in 1985-86. Estimates of the number of classroom teachers, principals, supervisors, and other instructional staff are shown below for the two years.

Instructional staff	1985-86	1986-87
Elementary school classroom teachers	1,239,029	1,261,042
Secondary school classroom teachers	970,926	972,398
Total classroom teachers	*2,209,955*	*2,233,440*
Other instructional staff	165,352	166,597
Principals and supervisors	139,449	140,077
Total staff	*2,514,756*	*2,540,114*

According to estimates for 1986-87, the instructional staff has experienced an increase of 1 percent over the previous year, mostly because of increases predicted in the number of elementary classroom teachers. The number of total instructional staff since 1976-77 is shown below:

School year	Instructional staff	Percent change	
		Over 1976-77	Over previous year
1976-77	2,464,818	...	...
1977-78	2,470,281	0.2	0.2
1978-79	2,504,722	1.6	1.4
1979-80	2,521,233	2.3	0.7
1980-81	2,484,743	0.8	1.5
1981-82	2,455,170	-0.4	-1.2
1982-83	2,435,805	-1.2	-0.8
1983-84	2,438,667	-1.1	0.1
1984-85	2,473,877	0.4	1.4
1985-86	2,514,756	2.2	1.7
1986-87	2,540,114	3.1	1.0

Classroom Teachers

The 10-year trend in the number of elementary and secondary school classroom teachers is featured below, indicating changes over time as local districts respond to supply and demand factors:

School year	Elementary school classroom teachers	Secondary school classroom teachers	Total classroom teachers
1976-77	1,171,158	1,007,706	2,178,864
1977-78	1,171,720	1,016,102	2,189,438
1978-79	1,189,319	1,009,796	2,199,115
1979-80	1,206,391	1,004,974	2,211,365
1980-81	1,195,725	996,438	2,192,163
1981-82	1,199,928	958,552	2,158,480
1982-83	1,183,983	951,322	2,135,305
1983-84	1,187,032	955,421	2,142,453
1984-85	1,208,744	965,642	2,174,386
1985-86	1,239,029	970,926	2,209,955
1986-87	1,261,042	972,398	2,233,440

Elementary school classroom teachers are estimated to total 1,261,042 in 1986-87, a gain of 1.8 percent over the revised estimate of 1,239,029 for 1985-86, increasing steadily in number since 1982-83. The elementary school classroom teaching staff has experienced a net increase of nearly 8 percent since 1976-77. Classroom teachers at the secondary level are estimated at 972,398, up slightly over the revised estimate of 970,926 for 1985-86. Over the years since 1976-77 the number of secondary school teachers has decreased over 3 percent.

The total number of classroom teachers is estimated to increase by more than 23,000 for 1986-87, a slight percentage increase over the revised total of 2,209,955 for 1985-86. Combining losses in secondary teachers with increases in the number of elementary teachers brings the total teaching population to its highest level ever.

Instructional Staff Salaries

Compensation, specifically salary levels, have become increasingly prominent in current discussions of education reform. Complex issues of attraction and retention of qualified education personnel have brought a focus on the competitiveness of beginning salaries as well as considerations of career earnings potential. To be sure, salary statistics for classroom teachers and other instructional staff will be evaluated more and more, particularly in those states and school districts where adequate numbers of instructional staff will be difficult to secure.

It is important to note the vast differences among staff salaries which are not apparent in statewide averages. Average salary statistics can hide as much

as they reveal at the state level especially, and users of these data must recognize their limitations. Clearly, compensation systems at the district level include far more than just salaries. Unfortunately, it is difficult to quantify and categorize employee benefits—monetary and nonmonetary—which characterize public school employment. Add the fact that each state is made up of individual school district employers, and it is apparent that salary statistics alone should not be the basis for evaluative decisions about state or district compensation characteristics.

Also, presentation of average salary figures in the absence of other information about states and districts to which they pertain says little about the actual "value" of those salaries with regard to the cost of living in those geographic areas. Recognition of the geographic variation in cost of living indices helps to understand differences in salary levels from one area of the country to another.

The national average instructional staff salary for 1986-87 is estimated to be $27,878, and the revised estimate for the prior year is $26,291 (Table 7). The gain of $1,587 between 1985-86 and 1986-87 represents an increase of 6.0 percent.

These average salary figures are for the entire instructional staff—classroom teachers, principals, supervisors, and other instructional personnel. In the computation of the national average, each state average is weighted by its number of instructional staff members.

The 10-year nationwide salary trend for the total instructional staff is shown below:

School year	Average annual salary	Percent change over previous year
1976-77	$13,840	. . .
1977-78	14,698	6.2
1978-79	15,764	7.3
1979-80	16,715	6.0
1980-81	18,404	10.1
1981-82	20,327	10.4
1982-83	21,630	6.4
1983-84	22,895	5.8
1984-85	24,655	7.7
1985-86	26,291	6.6
1986-87	27,878	6.0

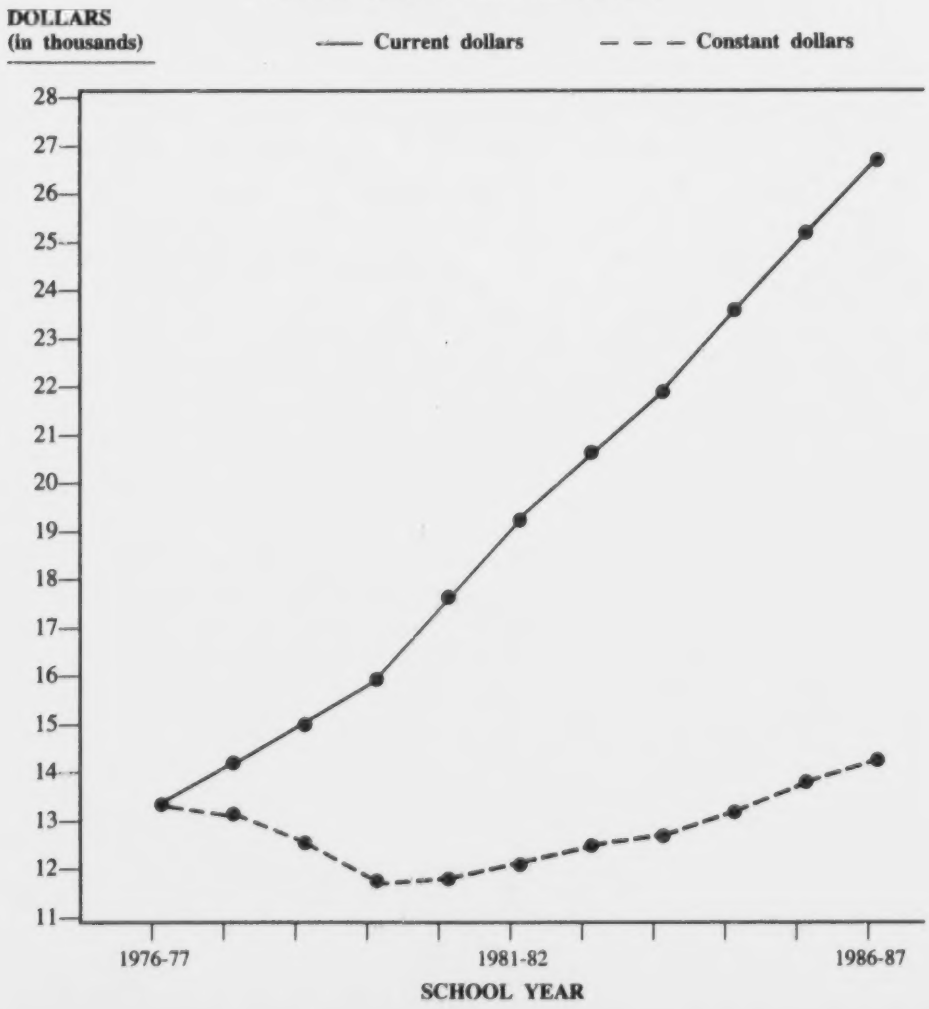
The average salary per member of the instructional staff in 1986-87, estimated at $27,878, is an increase of 101.4 percent in *current dollars* over the average salary of $13,840 reported for 1976-77. Accounting for inflation over the period of 1976-77 to 1986-87, (CPI-U, 1976-77 = 100.0) the instructional staff salary rose only 7.3 percent on average.

Classroom Teachers' Salaries

The U.S. average classroom teacher salary is estimated to be $26,704 for the 1986-87 school year. This represents an increase of 5.9 percent, in current dollars, over the revised figure of $25,206 in 1985-86. As with the average instructional staff salary, salary gains in "real" or constant-dollar terms for classroom teachers appear more moderate. The average gain in purchasing power for public classroom teacher salaries is estimated at six and one half percent over the period 1976-77 to 1986-87. While this level of increase was typical for public sector employees during the period, actions taken by state and local governments to enhance the competitiveness of teacher salaries should accommodate effects of these historical losses to inflation.

The following graph highlights the differences between the average classroom teacher salary in current versus constant dollars. The current-dollar increases over the years since 1976-77 appear substantial—from $13,354 in 1976-77 to $26,704 estimated for this year—a 100 percent increase in unadjusted terms. When the effects of price inflation are taken into account, the average teacher salary grows by only $873 or 6.5 percent over the decade (from $13,354 to $14,227 in 1976-77 dollars).

AVERAGE CLASSROOM TEACHER SALARY
School Years 1976-77 to 1986-87



The wide differences among states in average teacher salaries are confirmed in the following distributional table. Estimated average salaries paid to classroom teachers in 1986-87 vary from a low of $18,781 to a high of $43,970. Average salaries of classroom teachers for the 50 states and the District of Columbia are distributed as follows:

Estimated average annual salary of classroom teachers	Number of states	Estimated average annual salary of classroom teachers	Number of states
Under $19,000	1	$25,000-26,999	8
19,000-20,999	2	27,000-28,999	11
21,000-22,999	12	29,000-30,999	1
23,000-24,999	10	31,000 and over	6

In 1986-87 the salary in the state with the highest average annual salary of classroom teachers is expected to be 234 percent higher than that in the state with the lowest salary. The dollar gap has grown from $11,479 in 1976-77 to $25,189 in 1986-87.

Average salary data for elementary and secondary classroom teachers follow in the next table. Differences in salary levels between elementary and secondary teachers are the result of a variety of factors which vary from state to state and district to district. It should not be assumed that elementary classroom teachers are paid more or less than secondary classroom teachers (or vice versa) strictly on the basis of what grade level they teach.

Elementary school teachers are expected to earn an average salary of $26,141 in 1986-87, an increase of approximately 6 percent over the revised estimate of $24,667 for 1985-86. The average salary for secondary teachers is estimated at $27,351, with a similar percentage increase over the previous year. Data for public classroom teachers since 1976-77 are as follows:

School year	Average annual salaries, 1976-77 to 1986-87		
	Elementary	Secondary	Total
1976-77	$12,989	$13,776	$13,354
1977-78	13,845	14,603	14,198
1978-79	14,681	15,450	15,032
1979-80	15,569	16,459	15,970
1980-81	17,230	18,142	17,644
1981-82	18,853	19,805	19,274
1982-83	20,226	21,288	20,693
1983-84	21,456	22,554	21,917
1984-85	23,185	24,197	23,595
1985-86	24,667	25,842	25,206
1986-87	26,141	27,351	26,704

REVENUES

The financing of public elementary and secondary schools presents several challenges to educators and policymakers in the current context of educational reform, state-local fiscal constraint, enrollment growth, teacher shortages, and the deficit-reduction policies pursued by the national government. State and local government officials are realizing that in the 1980s, the costs of education reform measures and those associated with increasing enrollment are difficult to accomodate under existing fiscal and intergovernmental relationships. Certainly, major tax sources and other state-local revenue components will be increasingly scrutinized for their productivity, adequacy, and equity effects.

Some states have increased rates for selected taxes in order to pay for educational improvement measures enacted in state legislatures. Yet, revenue projections made by state education agencies for inclusion in this report may be insufficient to fully fund the various reform initiatives. Indeed, the nationwide average increase in total revenue receipts between 1985-86 and 1986-87 (in percentage terms) does not differ from rates of increase in past years, as indicated in a table below. State figures for revenue and nonrevenue receipts, featured in Tables 8 and 9, provide more detail about changes in education funding and the shifting roles played by federal, state, and local governments.

Revenue Receipts

Public school revenue receipts reported by state agencies for the *Estimates of School Statistics* survey include all receipts that become available during the school year. Receipts used for payment of principal and interest on long-term debt, and nonrevenue receipts used largely for capital outlay expenditures are included. The figures on expenditures, however, include capital outlay but not payments to amortize debt. Chiefly for this reason, total receipts generally will be in excess of total expenditures.

This series includes revenue receipts available for expenditures for current expenses (including nonday-school programs operated by the public schools), capital outlay, and debt service for public schools. Included as revenue receipts are all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands and miscellaneous sources (interest on bank deposits, tuition, gifts, school lunch charges, etc.)

For 1986-87, revenue receipts are estimated at $160,908,262,000, an increase of 6.3 percent over the revised figure of $151,332,782,000 reported for 1985-86. From 1976-77 through 1986-87 school revenue receipts increased 114 percent, in current or unadjusted dollars. Adjusting for inflation in 1976-77 dollars, public school revenues increased by only 13.8 percent over the decade. Since the beginning of the 1980s, revenues from federal, state, and local sources have barely met the increases in price inflation. It is fair to question the future of many state-level education reforms in light of these revenue estimates, and to emphasize the need to examine local, state, and national revenue systems so that public education improvements can be implemented fully and evaluated fairly.

School year	Amount (in thousands)	Percent change	
		Over 1976-77	Over previous year
1976-77	$ 75,303,394	. . .	. . .
1977-78	82,145,949	9.1	9.1
1978-79	87,800,403	16.6	6.9
1979-80	97,634,788	29.7	11.2
1980-81	106,552,320	41.5	9.1
1981-82	113,998,989	51.4	7.0
1982-83	120,759,492	60.4	5.9
1983-84	128,928,908	71.2	6.8
1984-85	141,009,565	87.3	9.4
1985-86	151,332,782	101.0	7.3
1986-87	160,908,262	113.7	6.3

State-by-state figures on the sources of school revenue are given in Tables 8 and 9, columns 2-4 and 6-8, for the years 1985-86 and 1986-87, respectively. These estimates show an expected $171,951,000 increase in federal revenues, an expected increase of $5,101,247,000 in state revenues, and an increase of $4,302,282,000 in local revenues, for a total increase of $9.6 billion in revenue receipts for the year. In percentage terms, contributions by the three levels of government rose by 1.7, 6.8, and 6.5 percent, respectively. Expressing the increases over 1985-86 in constant dollars, a more moderate level of increase—4 percent for total revenues—is evident.

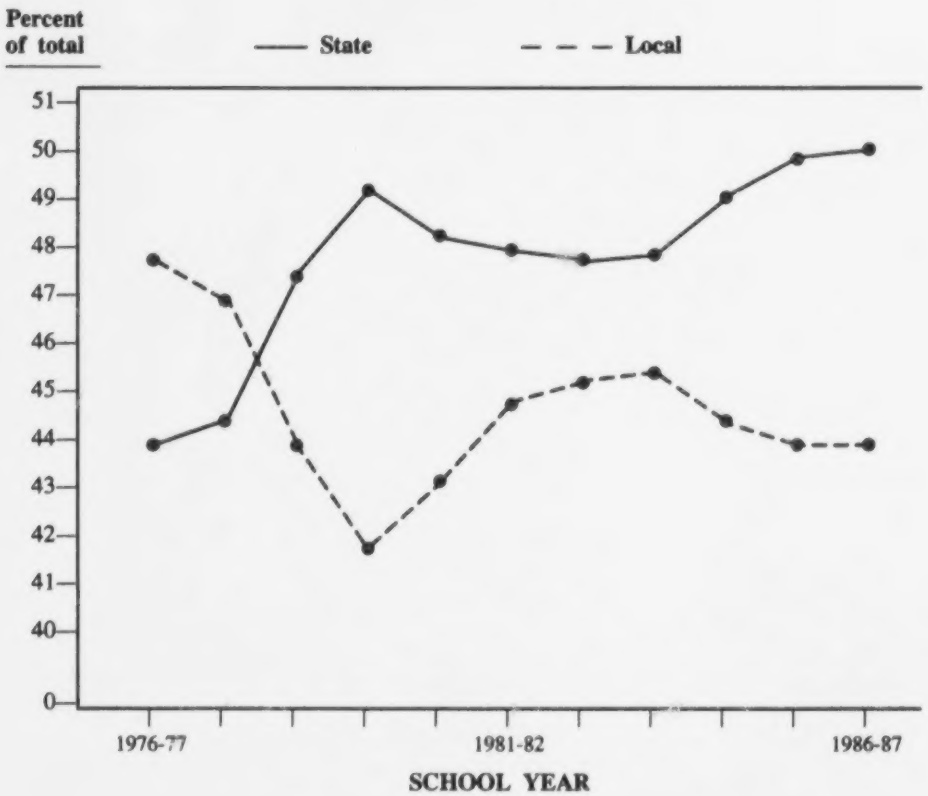
The following figures show the amounts and percents of revenue receipts from federal, state, and local sources for the years 1976-77 through 1986-87. During this period, the percentage of state receipts has grown from 43.8 percent of total revenue receipts to 50.0 percent, constituting the largest source of public school funds since 1978-79. State resources, derived primarily from income and sales taxes, have increased by 144 percent since 1976-77. Local and intermediate sources of school revenues, coming mostly from property taxation, grew by 96 percent. Clearly, state governments have assumed the primary role in financing schools, both proportionately and in absolute terms.

School year	Revenue receipts (in thousands)					
	Federal		State		Local and other sources	
	Amount	Percent of total	Amount	Percent of total	Amount	Percent of total
1976-77.....	$6,354,615	8.4	$32,983,433	43.8	$35,965,346	47.8
1977-78.....	7,231,520	8.8	36,369,088	44.3	38,545,341	46.9
1978-79.....	7,769,190	8.8	41,524,286	47.3	38,506,927	43.9
1979-80.....	9,020,165	9.2	47,928,660	49.1	40,685,963	41.7
1980-81.....	9,285,193	8.7	51,375,525	48.2	45,891,602	43.1
1981-82.....	8,419,359	7.4	54,573,117	47.9	51,006,513	44.7
1982-83.....	8,623,079	7.1	57,557,593	47.7	54,578,820	45.2
1983-84.....	8,801,655	6.8	61,603,642	47.8	58,523,611	45.4
1984-85.....	9,282,798	6.7	69,138,507	49.0	62,588,260	44.4
1985-86.....	9,786,607	6.5	75,331,882	49.8	66,214,293	43.8
1986-87.....	9,958,558	6.2	80,433,129	50.0	70,516,575	43.8

The shift in the percentage distribution of public school revenue receipts is illustrated in the following graph, showing the changing roles of state and local government funding of public education over the period 1976-77 to 1986-87. The point at which the state share and the local share of education finance begin a role reversal reflects, in part, the adoption of California's Proposition 13 in 1978-79, which had so dramatic an effect on California school finance that national averages mirror the reduced role of local government support in that state.

A continuing shift in the distribution of financial responsibility among the three levels of government has many implications for public education, particularly during the current intergovernmental context wherein state and local governments are assuming increased financial responsibility for many public sector programs. Demographic factors such as the aging of the 1950s baby boom cohort and effects of the 1970's mini-boomlet will put immense pressure on local and state fiscal systems. Educators thus will have an increasing responsibility to influence state-local fiscal policies so that the adequacy of public school finances is guaranteed.

STATE VS. LOCAL SCHOOL REVENUES
As Percent of Total Revenues
School Years 1976-77 to 1986-87



EXPENDITURES

The total expenditures of the public schools, including current expense, capital outlay, and interest, are expected to increase from $150,914,641,000 in 1985-86 to an estimated $160,478,723,000 in 1986-87. The increase of $9.6 billion includes expected expenditures from federal appropriations, rising state appropriations, and increasing local tax revenues. Increased expenditures are estimated for all major categories of expenditure, i.e., current expenditures for elementary and secondary day schools, current expenditures for other programs (community services, community colleges, adult education, etc. when operated by local school districts), capital outlay, and interest on school debt. Repayment of principal on bonded indebtedness is not included.

Total Expenditures

The total amount to be spent during 1986-87 for current expenses, capital outlay, and interest on school debt represents a 6.3 percent increase over comparable expenditures estimated for 1985-86 and a 115 percent increase over 1976-77. Adjusting for the effects of price inflation, change in total public school expenditures is estimated at 4 percent between 1985-86 and 1986-87, and 14 percent over the decade.

Total expenditures from 1976-77 to 1986-87 are reported in the following table:

School year	Amount (in thousands)	Percent change over previous year
1976-77	$ 74,722,243	. . .
1977-78	80,935,157	8.3
1978-79	86,808,086	7.3
1979-80	96,105,379	10.7
1980-81	105,102,889	9.4
1981-82	113,004,939	7.5
1982-83	119,158,187	5.4
1983-84	126,712,234	6.3
1984-85	138,736,114	9.5
1985-86	150,914,641	8.8
1986-87	160,478,723	6.3

Current Expenditures

Current expenditures of elementary and secondary day schools include amounts paid for general control, instructional service, operation, maintenance, fixed charges, and other school services at all levels of administration—state, intermediate, and local. Current expenditures comprise all governmental contributions to the retirement fund and expenditure for school services, including attendance, health services, transportation, the net cost of food services, and other school services. This figure does not include payments for capital outlay and interest on school debt or, except when otherwise noted, amounts spent for community colleges, summer school, community services, and services to nonpublic school students.

Current expenditures are expected to increase from $137,604,829,000 in 1985-86 to $146,244,160,000 in 1986-87, a 6 percent increase in current-dollar terms. In 1976-77 dollars, current expenditures of public elementary and secondary schools in 1986-87 are to grow by 4 percent over the prior year and 19 percent over 1976-77. The following figures show the current expenditure for the United States over the last decade:

School year	Amount (in thousands)	Percent change over previous year
1976-77	$ 65,483,994	. . .
1977-78	71,530,946	9.2
1978-79	77,285,131	8.0
1979-80	85,660,796	10.8
1980-81	94,210,362	10.0
1981-82	102,047,586	8.3
1982-83	108,772,701	6.6
1983-84	116,081,777	6.7
1984-85	126,857,256	9.3
1985-86	137,604,829	8.5
1986-87	146,244,160	6.3

Current Expenditure per Pupil in ADA

Current expenditure per pupil in average daily attendance (ADA) is the most frequently used indicator for examinations of public school spending, appearing in studies, newspaper accounts, and so on, where states are compared with one another on school expenditures. As with other state-level measures, current expenditure per pupil in ADA suffers from the shortcomings inherent as a statewide average, but also can be confusing because it is comprised of *two* statewide averages—expenditures, and ADA. Use of the figures should be supplemented by the reader's own knowledge of factors unique to their state or locality which would affect spending levels.

The estimated average expenditure per pupil in ADA for 1986-87 is $3,969, an increase of $214 over the revised figure of $3,755 for 1985-86. Over the last decade, the average per pupil expenditure rose by only $513, or 32 percent, after inflation.

The following table shows the average cost per pupil in ADA (in current dollars) for each year since 1976-77 and the percent increases in cost per pupil in ADA:

School year	Amount	Percent change over previous year
1976-77	$1,602	. . .
1977-78	1,781	11.2
1978-79	1,971	10.7
1979-80	2,230	13.1
1980-81	2,489	11.6
1981-82	2,753	10.6
1982-83	2,960	7.5
1983-84	3,181	7.5
1984-85	3,475	9.2
1985-86	3,755	8.1
1986-87	3,970	5.7

Variations among the states in average expenditures per pupil are wide. The statewide estimates for 1986-87 vary from a low of $2,455 to a high of $8,036, a difference of almost $5,600. Estimated expenditures per pupil in ADA for the 50 states and the District of Columbia are distributed as follows:

Current expenditure per pupil in ADA for elementary and secondary day schools	Number of states	Current expenditure per pupil in ADA for elementary and secondary day schools	Number of states
Under $2,500	1	$4,000-4,500	8
2,500-3,000	8	4,500-5,000	6
3,000-3,500	11	5,000-5,500	1
3,500-4,000	11	5,500 and over	5

Current Expenditure per Pupil in ADM

Average daily membership (ADM) is considered a better measure than ADA for use in computing per pupil expenditures. It represents an average of the pupils belonging—those attending (ADA) plus those absent—and provides a measure of the actual number of pupils for whom the expenditures were made. Because some states do not use this method of pupil reporting, figures on expenditures per pupil in ADM are incomplete.

Column 4 of Tables 11 and 12 gives the expenditure per pupil in ADM for 1985-86 (revised) and for 1986-87 for each of the states and the District of Columbia reporting ADM. From this incomplete return, the average expenditure per pupil in ADM for the U.S. is $3,555 for 1985-86 and $3,759 for 1986-87.

The following figures show the average cost per pupil in ADM starting with 1976-77. The percent increases in this measure are also shown below:

School year	Amount	Percent change over previous year
1976-77	$1,502	. . .
1977-78	1,666	10.9
1978-79	1,843	10.6
1979-80	2,099	13.8
1980-81	2,345	11.7
1981-82	2,596	10.7
1982-83	2,797	7.7
1983-84	3,008	7.5
1984-85	3,273	8.8
1985-86	3,555	8.6
1986-87	3,759	5.7

Capital Outlay

Total expenditures for capital outlay are estimated at $9,340,770,000 for 1986-87, an increase of approximately $785,000,000 over the 1985-86 level. The table below shows the trend over the last ten years, showing the variability in spending for this function resulting from shifting budget priorities and changes in school district needs for capital outlay.

School year	Capital outlay (in thousands)	Percent change over previous year
1976-77	$5,453,904	. . .
1977-78	5,511,869	1.1
1978-79	5,955,962	8.1
1979-80	6,503,975	9.2
1980-81	6,731,929	3.5
1981-82	6,404,379	-4.9
1982-83	6,131,172	-4.3
1983-84	6,280,830	2.4
1984-85	7,295,720	16.2
1985-86	8,555,282	17.3
1986-87	9,340,770	9.2

Interest on School Debt

For the school year 1985-86 total expenditures for interest on debts were estimated at $2,577,440,000. For the school year 1986-87 this expenditure grew to $2,704,650,000, an increase of almost 5 percent. The trend from 1976-77 to 1986-87 is shown below:

School year	Interest (in thousands)	Percent change over previous year
1976-77	$2,031,999	. . .
1977-78	1,897,474	-6.6
1978-79	1,916,729	1.0
1979-80	2,081,161	8.6
1980-81	2,156,133	3.6
1981-82	2,326,002	7.9
1982-83	2,251,510	-3.2
1983-84	2,333,081	3.6
1984-85	2,508,444	7.5
1985-86	2,577,444	2.8
1986-87	2,704,650	4.9

NOTES TO ALL TABLES

TABLES 1-11

The data shown by state and by region in Tables 1 to 11 are revised estimates for 1985-86 and preliminary estimates for 1986-87. Unless otherwise noted, these estimates are consistent with the accounting procedures defined and recommended by the U.S. Department of Education. NEA Research's own estimates are submitted to the cooperating agencies for verification or revision.

Tables 1-11 show totals for "50 states and D.C." This consists of a summation of the data for the 50 separate United States and the District of Columbia, for a grand total of 51 jurisdictions. The territories and the outlying areas are not included in this total.

Unverified state figures identified below are NEA Research estimates based on regression equations for each variable. These regression-based estimates are used in those cases where the state departments of education do not submit complete *Estimates* reporting forms, or do not respond to the survey at all.

STATE DEPARTMENT OF EDUCATION FOOTNOTES

Colorado: Public school revenues and expenditures are reported on a calendar-year basis.

Hawaii: Classroom teachers are paid on the same salary scale and are in the same collective bargaining unit. Any differences between elementary and secondary teacher average salaries therefore are due to differences in longevity of service and educational credits earned beyond the bachelor's degree.

Indiana: The number of public high school graduates will include students attending night school correspondence courses, and summer school of previous year due to the collection instructions of report.

Mississippi: 1985-86 includes general fund student activity funds for the first time. 1986-87 includes statewide kindergarten for the first time.

Montana: 1986-87 salary data excludes Billings, MT.

Ohio: Average teacher salaries include supplemental pay. Without supplements they would be: 1985-86 $24,518; 1986-87 $25,717. Total expenditures do not include debt retirement monies as follows: 1985-86 $553,500,000; 1986-87 $625,000,000.

Oregon: Salaries include a 6 percent pickup of employee portion of retirement contribution by employer.

Tennessee: Salary data includes career ladder supplement.

Utah: Average classroom teacher salaries do not include compensation provided through the state-funded career ladder program estimated at $1,695 for 1985-86 and $1,850 for 1986-87.

Virginia: Average salary data may include salary supplements from career ladders or merit pay systems if such were paid by any LEAs.

GLOSSARY

Average Daily Attendance, ADA. The aggregate days attendance of a given school during a reporting period divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily attendance for groups of schools having varying lengths of terms is the sum of the average daily attendances obtained for the individual schools.

Average Daily Membership, ADM. The aggregate membership of a school during a reporting period divided by the number of days school is in session during this period. Only days on which pupils are under the guidance and direction of teachers should be considered as days in session. The average daily membership for groups of schools having varying lengths of terms is the sum of the average daily memberships obtained for the individual schools.

Average Salary. The arithmetic mean of the salaries of the group described. This figure is the average gross salary before deductions for Social Security, retirement, health insurance, etc.

Basic Administrative Unit. The local school district, the unit for the operation of elementary and secondary schools or for contracting for school services.

Capital Outlay. An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings, improvements of grounds, construction of buildings, additions to buildings, remodeling of buildings, or initial, additional, and replacement of equipment.

Classroom Teacher. A person who performs the day-to-day activities of teaching students all or aspects of the regular curriculum.

Current Expenditures. Any expenditure except for capital outlay and debt service. Current expense includes total charges incurred, whether paid or unpaid.

Current Expenditures for Elementary and Secondary Day Schools. Included are:

a. Expenditures for ADMINISTRATION by the state board of education and the state department of education *excluding* expenditures for vocational rehabilitation and salaries for personnel who provide supplementary services, such as state library, state museum, teacher retirement, teacher placement, etc.

b. Expenditures for ADMINISTRATION by county or other intermediate administrative units.

c. Total current expenditures by local school districts, such as expenditures for administration, instruction, attendance, health, transportation, net food service, maintenance and operation, and other net expenditures to cover deficits for extracurricular activities for pupils. (Net food service also includes the value of commodities donated by the U.S. Department of Agriculture, such as those provided through the school lunch and milk programs.)

d. Direct state expenditures for current operations, such as state (employer) contributions to retirement systems, pension funds, or Social Security on behalf of public school employees; state expenditures for textbooks distributed to local school districts; and all other expenditures made by the state on behalf of free public elementary and secondary schools. Includes current expenditures made for vocational/technical elementary or secondary education.

Current Expenditures for Other Programs. Current expenses for summer schools, adult education, post-high-school vocational education, personnel retraining, and community services; services to private school pupils, community centers, recreational activities, and public libraries, etc., when operated by local school districts and *not* part of the regular public elementary and secondary day-school program.

Elementary. The school grades from kindergarten through grade six.

High School Graduate. A person who receives formal recognition from the school authorities for completing the prescribed high school course of study; excludes equivalency certificates.

Instructional Staff. Number of positions, not the number of different individuals occupying the positions during the school year. In local schools includes all public elementary and secondary (junior and senior high) day-school positions (or full-time equivalents) that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, psychological personnel, and other instructional staff. Excludes attendance personnel, clerical personnel, and junior college staff.

Interest on School Debt. The amount spent by *and* for local education agencies for interest payments on bonds and short- and long-term loans. School housing authority interest payments are also included.

Nonoperating School District. A school district that does not provide direct instruction for pupils but contracts with or pays tuition to other districts.

Nonrevenue Receipts. The amount received by local education agencies from the sale of bonds and real property and equipment; loans and proceeds from insurance adjustments.

Nonsupervisory Instructional Staff. Persons such as curriculum specialists, counselors, librarians, remedial specialists, and others possessing educational certification but who are not responsible for regular day-to-day teaching of the same group of pupils.

Operating School District. A school district that directly provides instruction for pupils by hiring its own staff.

Revenue Receipts. Additions to assets that do not incur an obligation that must be met at some future date and do not represent exchanges of property for money. Assets must be available for expenditures.

Secondary. The school grades from seven to twelve.

Supervisory Staff. Principals, assistant principals, and supervisors of instruction (does not include superintendents or assistant superintendents).

Total Expenditures. Includes all current expenditures, capital outlay, and interest on the school debt.
